CHRISTIAN PAUL J. GELERA

Caloocan City, PH • 09926675751 • cgelera3@gmail.com • github.com/javahuhu

Summary

Full-Stack Software Developer experienced in building cross-platform enterprise applications using Flutter, FastAPI, Python, and MySQL. Developed and deployed 10+ ERP modules supporting inventory, ticketing, approval workflows, reporting, and other business operations. Experienced in REST API development, Clean Architecture, BLoC/Cubit state management, database optimization, and Linux-based application deployment.

Experience

Full-Stack Developer | Amici Mercantile Inc. Quezon City, PH **|** Dec. 2025 – Present

Businessware (Web and Mobile)

- Developed and deployed 10+ ERP modules across Flutter web/mobile and FastAPI, supporting business processes including ticketing, inventory tracking, reporting, and multi-stage approval workflows.
- Implemented Clean Architecture and BLoC/Cubit state management to improve separation of concerns, maintainability, and consistency across Flutter features.
- Built reusable Flutter UI components and shared application patterns to reduce repetitive frontend development and accelerate implementation of new modules.
- Integrated REST APIs with Flutter applications to support data retrieval, transaction processing, filtering, validation, and synchronization across enterprise workflows.

Backend & Infrastructure

- Developed and maintained RESTful APIs using FastAPI and Python to connect Flutter applications with backend services and MySQL databases.
- Optimized MySQL schemas, indexes, queries, and stored procedures to improve report execution and database performance.
- Containerized and deployed applications using Docker on Ubuntu Linux, managing application dependencies, server configurations, deployments, and production troubleshooting.

Front End Developer (Intern) | moodLearning UP Diliman, Engr Bldg **|** 03/2025 - 04/2025

- Developed responsive React-based user interfaces for web application features.
- Improved search and content discovery by implementing categorized filters and integrating dynamic API-driven search functionality.
- Built interactive media components including animated carousels and video interfaces to improve content presentation and user interaction.

Projects

PetSymp – AI-Based Pet Illness Classification System Flutter • FastAPI • Python • Firebase • Scikit-Learn (Gradient Boosting & AdaBoost)

Full Stack Developer

- Developed a cross-platform pet health application combining a forward-chaining knowledge base with category-specific Gradient Boosting and AdaBoost classification models.
- Built and integrated the machine-learning diagnosis workflow with a Flutter frontend and FastAPI backend for symptom-based illness classification. Developed backend services for symptom analysis, diagnosis history, user authentication, and application data management using FastAPI and Firebase.

Skills & Interests

Programming Languages: Dart, Python, JavaScript, TypeScript, SQL, Swift.
Frameworks & Libraries: Flutter, FastAPI, Flask, React, BLoC, Cubit
Databases: MySQL, MariaDB,MongoDB, SQLite, Firebase Authentication, Cloud Firestore, Firebase Storage, Supabase.
State Management: BLoC, Cubit, Provider, Riverpod.
Tools & Platforms: Git, GitHub, GitLab CI/CD, Visual Studio Code, Android Studio, Postman, Figma, Ubuntu, Nginx, XCode
Architecture & Technologies: RESTful API Development, Clean Architecture, MVC, MVVM, State Management, SQL Query Optimization.
Deployment: Google Play Store, Apple App Store, Ubuntu Server.

Education

Technological Institute of the Philippines **Aurora, Cubao. Quezon City**
Bachelor of Science in Computer Science, August 8, 2025
Academic Honors: Dean's Lister | VPAA's Lister
